2023 年度　第 14 回　大学院セミナー

2023 年　5　月　1　日

分　野　名 (責任者名)(内線)	アイソトープ診断治療学分野（原研放射） 責任者名(工藤　崇)　　内線(7101)
演　　題	第 175 回 原研研究集会 GENKEN research seminar
講　師　等	原研放射　福田直子、西　弘大、工藤　崇
概要	1. **Archives of soil samples collected from radioactive fallout area of the Nagasaki atomic bombing.** The database of soil samples collected for the study of the effects of radioactive fallout from the Nagasaki atomic bombing has been completed. A soil storage room has been completed and is open to visitors. The results of re-measurements of some of the samples will be reported. 2. **Control of radioactive iodine disposition for suppression of thyroid exposure.** The majority of orally ingested radioactive iodine is transferred to the thyroid gland. A method has been developed to reduce thyroid exposure by inhibiting gastrointestinal absorption of radioactive iodine. Specific details of the study will be reported. 3. **Occupational radiation exposure of medical workers in University Hospital (excerpt).** A clinical study on occupational exposure of medical workers working in University hospital was conducted jointly by Nagasaki University, Hiroshima University, and Fukushima Medical University Since a large amount of analysis was conducted, only excerpts are reported here.
開催日時	2023 年　5　月　24　日（　Wed　） 17:30～18:30
開催方法	On ZOOM
備考	受講を希望する場合は、ＩＤ・パスワードをお知らせしますので、 原爆後障害医療研究所アイソトープ診断治療学研究分野（原研放射） 担当 工藤　崇　e-mail:tkudo123@nagasaki-u.ac.jp （内線：7103）までご連絡ください If you would like to participate in this seminar and need Zoom ID and Password, please contact Prof. Kudo. （ e-mail:tkudo123@nagasaki-u.ac.jp ）
